Introduction

Data in this edition of *World Jet Airplane Inventory* reflect, as accurately as possible, the status of the world's commercial jet airplane fleets (and some military derivatives) at the end of the year 1983.

World Jet Airplane Inventory is composed of a selected number of computer printouts from JETTRACK, a computer-based jet-airplane-inventory system kept by the Market Research Department of Boeing Commercial Airplane Company. Fleet data in this system are obtained from many different sources, including airframe manufacturers, airplane owners and operators, governments, and trade publications.

This document provides details for announced orders, deliveries, and inventories for all commercial jet airplanes built in the United States and Western Europe with a capacity of 60-seats and up. In addition, the year-end 1983 inventory data in Sections 4 and 6 include non-Russian operators of the YAK 40 and larger jet equipment built in the U.S.S.R.

Announced jet airplane orders are summarized in Section 1. Orders that were placed and later cancelled are treated as if they never occurred.

The tabulations include all airplanes delivered to the market through December 31, 1983. This includes a small number of airplanes that were never sold by the manufacturer, but entered the commercial market on a lease basis. Not included are those manufacturer-owned airplanes that were never sold but are (or were) used exclusively for the manufacturer's private purposes, such as flight testing, etc.

A growing number of older airplanes are parked or stored at many different locations around the world. In many cases, the cost of restoring these airplanes to flight status would far exceed their market value. A serious attempt has been made to exclude these run-outs from the tabulations in this document. Nevertheless, a number of airplanes included in the inventory data in this document were not actually in service at the end of 1983. Obvious cases are airplanes in the inventories of brokers, leasing companies, and airplane manufacturers. This last category generally consists of trade-in airplanes. Details on parked airplanes included in the airline inventories are given in the footnote to Section 1, Table 8, on page 10.

Leased airplanes are included in the operators' fleets. Section 7 provides details on airplanes leased out by airlines.

Abbreviations

Operator names in this document are often abbreviated and therefore may vary from official names.

Some frequently used abbreviations of operator names include:

AL	Airline(s) Aerolineas, etc.
AT	Air Transport, Aero Transportes, etc.
ATC	Air Travel Club
AVN	Aviation
AW	Airways
GOVT	Government
INTL	International
TA	Transportes Aereos, etc.

In Sections 1 and 5, three-letter abbreviations are used for airplane types. These abbreviations are mostly self-explanatory with the following exceptions:

U.S.-built airplanes:

CVR	Convair 880 and 990
M80	MD-80 (DC-9-80)
D10	DC-10-10, -15
DLR	DC-10-30, -40, KC-10A
L10	L-1011-1, -100, -200
LLR	L-1011-500 C MK1
727	727-100, -100C QC, -100F
72S	727-200

Airplanes built in western Europe:

A30	A300
A31	A310
BAC	BAC One-Eleven
146	BAe 146
CMT	Comet
CON	Concorde
CVL	Caravelle
MRC	Mercure
TRD	Trident
V10	VC10, Super VC10

Sections 4, 6, and 7 provide details by airplane type and series. Most of the series designations are used throughout the industry, with the following exceptions:

DC-8 long body: series -61, -71, -63, -73
DC-8 standard body: all other DC-8s, including the series -62, -72

Series ending with "F" are either freighters or are airplanes originally delivered as passenger airplanes that were later fitted with a large cargo door. Included in the latter category are the following:

BAC-1-11-400F
Convair 880-22F
DC-8-20F, -30F, -61F
707-120F, -120BF, -220F, -320F
720-000BF (converted 720B)
747-100F (also called 747-100 Special Freighter)

A few 727-100s have been converted to 727-100F; however, most of the 727-100Fs were originally delivered as -100C, or -100QC, which already had the large cargo door. One 727-200 was converted to a -200F during 1983.

A few of the DC-8-50Fs and DC-8-63Fs in the world inventory were originally delivered as DC-8-40s, -50s, or -63s.

The series ending with "F" does not constitute the world's entire inventory of freighters. Many convertibles are used as freighters, while those 707-320Cs which were delivered as freighters are still listed as -320Cs (a 707-320F is a converted non-fan 707-320). In addition, a few airplanes originally delivered as passenger airplanes are now in use as freighters, without having been fitted with a large cargo door. These ex-passenger airplanes include some DC-8s, DC-9s, 707s, and Convair 880s. No "F" was added to the series in these cases.

Series ending with "C" are convertibles.

Series ending with "M" are Combis: 747-100M (converted 747-100); 747-200M (also called 747-200B SCD); and 747-300M.

Notes:
1) Deliveries exclude airplanes which were built, but which never entered the market. They are - or were - used by manufacturers for testing purposes, etc.
2) "B/U, etc.": Wholly or partly broken up, cannibalized for parts, stored but known to be broken up in near future, used for ground crew training, used for structural testing, used for fire practice.
3) "Preserved": Airplanes on display in museums, etc. (excludes preserved airplane sections)
4) "Retired, still stored": Stored run-outs (intact or derelict)

* W/O written-off
